THAW WINS ANOTHER POINT

Report of the New Hampshire Lunacy Commission is Admitted.

New York, June 28.—Harry K. Thaw scored another victory in his battle to prove he is sane this afternoon when Justice Hendrick ruled that the report of the New Hampshire lunacy commission would be admitted as evidence. This commission on January 6, 1914, gave the slayer of Stanford White a clean bill of health regarding his sanity.

STACK YOUR GRAIN

Unless some unforeseen calamity should occur the wheat crop this year will exceed the phenomenal crop of last year, and will probably be more than 700,000,000 bushels of winter wheat alone. This means that the threshing outfits, railroad elevators, etc., will be crowded to the utmost and a great part of the grain will stand in the field for weeks. Therefore, it should be stacked.

Stacking will save grain and straw which might otherwise be spoiled in wet weather.

Stacking will put grain through a complete sweat which will improve quality.

Threshing from the stack requires less help than shock threshing, which will equalize the cost of stacking.

Stacking furnishes good storage with absolutely no cost which would prevent glutting the market at any one time.

The grain must be removed for early working of the soil. Stacking makes it possible to plow following harvesting. Early plowing is one of the greatest factors in increasing the yield. Discing the land early is the next best thing.

NO KANSAS JOB

IF YOU DRINK

Governor Requests That No User of Liquor Be Appointed to Office—Would Make Drinking a Cause for Dismissal

Topeka, June 28.—A man who takes a drink cannot work for the state of Kansas. That's the new order of things in the state that has had prohibition for thirty-five years and now has fewer liquor users than most states. Governor Capper laid down the rule today in a letter to the new civil service commission, which goes to work July 1, and all applicants for jobs and those now holding places on the state payroll must come to the state without the liquor "bouquet."

The governor, in discussing the proposed rule, said Kansas should have applied it many years ago.

There now are about three thousand men and women on the payroll of the state. It is a big employer of labor of all kinds, from the high priced scientist in its schools and the heads of institutions with sixteen hundred patients of three thousand students down to the lowest paid laborer to be found anywhere.

Kansas is the first state to put a prohibition on the use of liquor by its employees. As the rule is proposed to the commission two members of which are named by the governor, the use of liquor will be sufficient cause for dismissal from the public service. Many corporations now have this rule and the railroads not only make the use of liquor a cause for dismissal from the operating force, but a dismissal for using liquor practically means that the man cannot get a job on any other railroad.
